

OPEN POSITION: AUTOMATION PROJECT ENGINEER**REFERENCE ACTIVITY**

Reporting to the Automation Department Manager, the resource:

- will deal with the technical coordination of the automation projects assigned, as regards the phases of software development, internal tests, and commissioning.
- will personally develop parts of the code for particular functions and/or requests.
- will interface directly with the customer as regards the technical area, coordinating with the Project Manager of the order.
- will coordinate the commissioning team and the commissioning activities of the plant or line, respecting contractual times and performances, intervening appropriately on site as needed

The resource will take part in the training courses promoted by BM Group to deepen and improve their skills in the field.

WORKPLACE

- Borgo Chiese (TN)
- Brescia (BS)
- Rovereto c/o Polo "BE Factory" (TN)

REQUIREMENTS

- Interest in covering a role of technical responsibility, with the possibility of internal growth.
- Willingness to make occasional trips in Italy and abroad.
- Good knowledge of the English language.
- Good ability to coordinate small work teams.
- Excellent knowledge of PLC software development and commissioning in the field of industrial automation and process control, for the management of complete lines and/or machines, preferably in the steel or paper industry.
- Good knowledge of the use and programming of Drives/Inverters applied to motor control.
- Good knowledge of PID regulators.
- In-depth knowledge of industrial networks and electrical and electronic aspects for industrial systems.
- Good ability to read wiring diagrams and technical documentation.

WHAT WE OFFER

- Integration into a solid and rapidly growing international group with 30 years of experience in innovation, technology, and energy.
- Opportunity to grow and improve the job position, aspiring over the years to acquire responsibilities within the company.
- Opportunity to take part in innovative research and development activities.
- Job posting also on foreign branches (USA, Mexico, Brazil, South Korea).
- Technical, linguistic, and managerial training.
- Opportunity to travel and meet new people from different linguistic and cultural backgrounds.
- Shared apartment/hotel for non-residents during any training/work periods at the Borgo Chiese headquarters.
- Equipment: Smartphone and PC.

OUR COMPANY

Polytec, core business of BM Group, is a leading Italian company in digital transformation and energy transition.

BM Group is an Italian industrial group that combines companies with different specialisations that share a common goal: to enable industry to undergo the technological transformation necessary to become a smart and sustainable factory. The BM Group team is young, dynamic, and constantly collaborates with research centres and universities. For each new figure included in our staff, an induction programme is defined in the hiring phase in accordance with experience and skills. We organise and promote training courses with a view to continuous improvement.
